ABOUT ME

Aspiring software engineer with hands-on experience in backend development, machine learning, and full-stack applications. Proficient in Java, Python, .NET, Laravel, and React, with a strong foundation in algorithms, data structures, and database design. Practical problem-solver with proven ability to deliver in Agile team environments, currently applying these skills in a professional internship setting.

TECHNICAL SKILLS

Programming Languages:

Proficient in: *Java, C#, Swift*
Strong command of: *Python*

Web Development:

.NET, Laravel, React, REST APIs, HTML, CSS

Databases:

MySQL, SQL Server, MongoDB, PostgreSQL

Version Control & Tools:

Git, GitHub, Visual Studio, Visual Studio Code, Agile / Scrum, Clean Architecture

LANGUAGES

- English - C1 Advanced (Cambridge English Certificate, 2020)
- Serbian (native)

ALEKSA VLAŠKI

SOFTWARE ENGINEERING INTERN

EXPERIENCE

Software Engineering Intern | Orion Innovation

- Collaborated in a 10-member Agile (Scrum) team using GitHub for version control and team workflows
- Developed RESTful APIs in .NET following Clean Architecture principles, writing maintainable and testable code with clear separation of concerns
- Contributed to code reviews, debugging, and feature development across the full development cycle
- Expanding into iOS development using Swift, actively contributing to mobile features

Feb 2026 - Present

Medior Technical Operator (Part-Time) at 365 Lab | Belgrade, Serbia

- Managed and operated photo/video marketing activations, including setup, connectivity, and live support
- Led troubleshooting and maintenance, ensuring reliable performance, minimal downtime, and a strong client experience

Jul 2023 - Jan 2026

PROJECTS

Fitness Training Booking System

Java, MySQL, Client-Server Architecture

- Developed a Java client-server application using Sockets and MySQL for user management and session scheduling
- Implemented authentication system, relational database design, and server-side business logic handling concurrent client connections

Full Stack Food Delivery Application

Laravel, React, MySQL

- Built a full-stack food delivery application using React frontend and Laravel REST API backend
- Implemented JWT authentication, order management system, and Axios-based API communication
- Designed relational database schema supporting dynamic restaurant browsing and order processing

Stock Price Trend Prediction with Machine Learning

Python, Scikit-learn, NumPy, Pandas

- Built a neural network system to predict stock price trends using financial ratios of healthcare companies
- Implemented full ML pipeline including data preprocessing, feature engineering, and model selection
- Compared feature aggregation strategies to improve model stability across different prediction horizons

Medical Appointment Application

.NET, SQL Server, Agile / Scrum, Clean Architecture

- Developed backend for a full-stack medical appointment application as part of a 10-member Agile team
- Responsible for backend development including API design, business logic, and SQL Server database integration

EDUCATION

Bachelor of Science in Information Systems and Technologies

OCT 2021 - FEB 2026

Faculty of Organisational Sciences, University of Belgrade

GPA: 9.32/10.00

High School Diploma in Electrical Engineering

SEP 2017 - JUN 2021

High School of Electrical and Technical Sciences "Nikola Tesla", Pancevo

GPA: 5.00/5.00
